

LEDParamsPackage

```
classDiagram
    LEDParamsPackageBlink --|> LEDParamsPackage
    LEDParamsPackagePlain --|> LEDParamsPackage
```

The diagram illustrates a class hierarchy. At the top is the 'LEDParamsPackage' class. Below it are two subclasses: 'LEDParamsPackageBlink' on the left and 'LEDParamsPackagePlain' on the right. A horizontal line connects the two subclasses, with an upward-pointing arrow from the center of this line to the 'LEDParamsPackage' class, indicating that both subclasses inherit from the parent class.
